

State of the art automated vision inspection, rejection, and intelligent material handling.

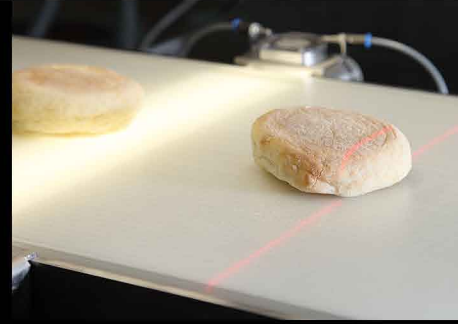

All MT systems can accurately measure anything you can bake, on any line you run, at whatever speed you can produce, no matter how wide it is or how fast it runs.

All MT systems are modular, and can be configured to suit virtually any environment.

Belt: width 6" to 102"
height 38" +/-12"
speed to 600 ft/min

Standard stainless steel frames and enclosures
Unlimited conveyor options, types and lengths
Auto-calibrating Auto-learn
Optional auto-rejection Air conditioned enclosures

From mini-donuts to loaves of bread and from miniature snacks to pizza crust, nothing is too big and nothing is too small.

MONTROSE TECHNOLOGIES INC.

A revolutionary change in product analysis.

The new range of MT vision systems were designed on 3 core principles:

- outstanding performance
- rugged, reliable operation
- exceptional value

The MT series can measure up to 50 objects per second.
That's *15,000 dozen per hour.*

The MT-Overline can be **installed in minutes**. Bolt it to the floor, run power and air to it, switch it on, and it's ready to work.
